REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Munn et al. (US 5,929,721, see figs. 7 and 8) shows an inductor pattern 714 having two linear portions extending in parallel and facing each other and provides a resonant circuit (col. 5, lines 38-47). However, Munn et al. does not show nor suggest providing the inductor pattern "on said first end face" (i.e., top surface) and "said conductor pattern having an inductance component which self-resonate at a frequency at which spurious of said filter is suppressed" as recited in claim 1, lines 11-14. Moreover, it is the examiner's opinion that it would have not been obvious to one of ordinary skill in the art to place the inductor pattern 714 on the top surface 702 instead on the side surface 712 in the device of Munn et al. since it appears Munn et al. teaches away from placing the inductor pattern on the top surface (the trap filter/circuit are placed orthogonally from the plane of the resonators, see figs 1-8, and col. 2, lines 40-60).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Seungsook Ham whose telephone number is (571) 272-2405. The examiner can normally be reached on Monday-Thursday, 8:00AM-5:00PM.
